## Featured Solar Home of the Month

### Adams Basin New York is our Featured Solar home!

David and Pat Haines are quoted as saying "The old meets the new". Their historic Bed & Breakfast located on the Erie Canal in Adams Basin has gone green, literally. But the green you see is more than skin deep!

This circa 1815 Bed & Breakfast located at 425 Washington Street in Adams Basin is using the latest in solar module technology, utilizing (18) state of the art SunPower SPR-225 solar modules, and a SunPower 4000M power inverter.

The system is capable of producing over 4,000Kwh's of electric per year, and will produce clean solar generated power over its 30 year projected lifecycle. This renewable system will offset approximately 40% of their electrical needs.
